2024 DESIGN COLLECTION

PANELS

5K Surface Technologies is a leading company that continuously develops new and innovative solutions thanks to its experience in the sector, technological infrastructure, expert teams and innovation-focused R&D culture.

Our products, which stand out with their aesthetically rich designs, superior quality, durability and functional solutions offered to users, can be produced with ultra-glossy, ultra-matte and three-dimensional textured surface options.

Combining high technology and art, our wide range of products appeals to many design styles such as modern, classical, minimalist, sophisticated and naturalist in furniture and interior design.

Our catalog includes interior architectural and furniture designs that demonstrate the use of our products in various application areas in a harmonious manner.

PRODUCT COLLECTIONS

Our product groups Lamigloss, Lamimatt, Lamiart, Lamifeel & Lamisyncron, Lamieffect are our collections produced using unique different technologies, in which we create special design sets according to pattern options.

Offered in a wide range from plain colors to wood, marble, stone and fantasy patterns, these collections are ideal for interior coverings and furniture with various surface options.

Lamigloss, Lamimatt, Lamiart, Lamifeel & Lamisyncron, Lamieffect collections provide designers and interior experts with a wide range of creativity, original designs and special solutions for each unique project.

The ability to combine products with the same surface coating in a single panel not only facilitates the application processes, but also provides advantages in terms of process and cost. This feature offers our users greater flexibility while helping them manage their projects more efficiently.

YÖZEY TEKNOLOJİLERİ A.Ş.

LAMIGLOSS

Produced using superior UV lacquer technology, Lamigloss offers a unique mirror effect.

With special formulas developed by 5K, Lamigloss makes a difference with its long-term durability in the areas where it is used, thanks to its excellent physical and mechanical properties.

LAMIMATT

Lamimatt, produced using excimer technology, has a unique surface with a silky touch feature which does not leave fingerprints. It has high resistance to scratches and stains.

LAMIART

The Lamiart collection offers special design options in high gloss or super matte surfaces, produced with advanced technology production processes.

Our products are manufactured with special components that ensure high resistance, durability and superior quality, while also having surprising technical properties where sustainable surfaces combine art and functionality.

The Lamiart collection is designed to add elegance and uniqueness to any space.

This collection is not just a surface but also a work of art; It goes beyond adding elegance and functionality to your spaces.

LAMIFEEL – LAMISYNCRON

This collection offers fascinating natural-looking products with 3D-effect surfaces with matching textures and visuals treated with special painting techniques on the panel surfaces.

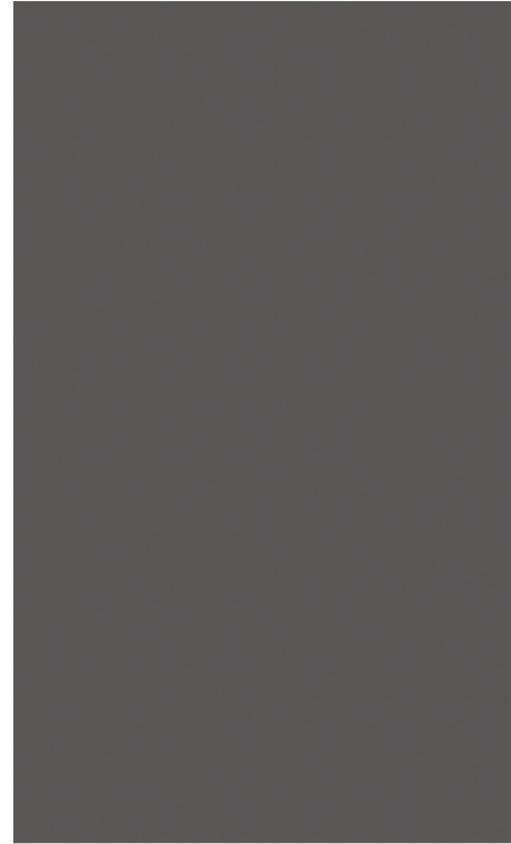

Each product is designed to offer a unique touch and experience that is far from ordinary. The designs you will discover in this collection will take you to a world where you have no chance of finding anything similar.

LAMIEFFECT

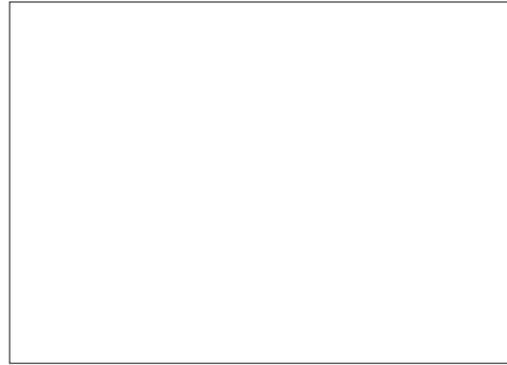

Our Lamieffect collection offers a fascinating product series with natural wood surfaces, created by mechanically processing the 3D texture directly onto the panel surface by applying special techniques.

Each piece in this collection is produced with meticulous workmanship and innovative technology, bringing the warmth and naturalness of wood to modern living spaces, while offering the perfect balance between durability and aesthetics

LAMIGLOSS FEATURES

Extremely resistant to scratches and abrasions

Surfaces resistant to impacts and wear that may occur in contact with objects.

Stain resistance

Products resistant to all kinds of food and chemical stains for daily use.

Environmentally friendly

Products produced with certified raw materials obtained from sustainable forests.

Light fastness

Thanks to the high resistance to light, colors remain unchanged.

High brightness

Unique surfaces that offer a mirror effect with their reflections and finishes.

Long lasting

Long-lasting durability against harsh environmental conditions.

Antibacterial and does not contain toxic substances

Surfaces resistant to impacts and wear that may occur in contact with objects.

LAMIFEEL & LAMISYNCRON FEATURES

Natural surfaces

Surfaces that provide a natural and realistic finish.

Stain resistance

Products resistant to all kinds of food and chemical stains for daily use.

Environmentally friendly

Products produced with certified raw materials obtained from sustainable forests.

Color stability

Thanks to the high resistance to light, colors remain unchanged.

Easy to clean

Thanks to its quality coating, the surfaces are easy to maintain and clean.

Long lasting

Long-lasting durability against harsh environmental conditions.

Antibacterial and does not contain toxic substances

Surfaces resistant to impacts and wear that may occur in contact with objects.

LAMIMATT FEATURES

Extremely resistant to scratches and abrasions

Surfaces resistant to impacts and wear that may occur in contact with objects.

Stain resistance

Products resistant to all kinds of food and chemical stains for daily use.

Environmentally friendly

Products produced with certified raw materials obtained from sustainable forests.

Light fastness

Thanks to the high resistance to light, colors remain unchanged.

Fingerprint prevention

Surfaces that are fingerprint resistant and easy to clean.

Surface matteness

Superior quality, natural-looking surfaces obtained by providing perfect distribution of reflected light with Excimer technology.

Long lasting

Long-lasting durability against harsh environmental conditions.

Antibacterial and does not contain toxic substances

Surfaces resistant to impacts and wear that may occur in contact with objects.

Soft touch effect

Soft surfaces with velvet and silky texture.

LAMIEFFECT FEATURES

Natural surfaces

Surfaces that provide a natural and realistic finish.

Stain resistance

Products resistant to all kinds of food and chemical stains for daily use.

Environmentally friendly
